

Checklist for Therapeutic Use Exemption (TUE) Application **Asthma**

ADO logo

Prohibited Substances: Beta-2-agonists, Glucocorticoids

This Checklist is to guide the athlete and their physician on the requirements for a TUE application that will allow the TUE Committee to assess whether the relevant <u>International Standard for Therapeutic Exemptions (ISTUE)</u> criteria are met.

Please note that the completed TUE application form alone is not sufficient; supporting documents <u>MUST</u> be provided. *A completed application and checklist DO NOT guarantee the granting of a TUE.* Conversely, in some situations a legitimate application may not include every element on the checklist.

TUE Application form must include:		
	All sections completed in legible handwriting	
	All information submitted in [language(s) as per ADO preferences]	
	A signature from the applying physician	
	The Athlete's signature	
Medical report should include details of:		
	Medical history: symptoms of airway obstruction, provocative stimuli, aggravating factors, exacerbations, age at onset, course of disease under treatment (specify)	
	Findings on examination: airflow obstruction at rest, exclusion of differential diagnoses	
	Summary of diagnostic test results: spirometry, if spirometry normal, include reversibility test, if both normal, include provocation test	
	Interpretation of symptoms, signs and test results by respiratory physician	
	Beta-2-agonists (except for salbutamol, salmeterol, formoterol, vilanterol by inhalation and in therapeutic doses, all are prohibited at all times) and/or glucocorticoids (only prohibited incompetition and when given systemically) prescribed including dosage, frequency and administration route	
	Response to treatment with previous/current medication	
Dia	Diagnostic test results should include copies of:	
	Spirometry report with flow curve	
	Spirometry report with flow curve after bronchodilator administration (reversibility test) if above spirometry shows normal findings	
	Documentation (including spirometry report with flow curve) of a recognized provocation test if both spirometries above show normal findings	
Add	litional information (if necessary)	
	Peak flow log, allergy test results, previous spirometry and provocation tests results
