3.8.3	<i>ISO Logo for Laboratories</i>	50

1 Introduction

The Anti-Doping Administration and Management System (ADAMS) received a functional upgrade to Version 3.0 on 22-Nov-2011 at 14:00 EDT.

This document outlines the changes made to the application in Version 3.0.

2 Browser Requirements

2.1 Supported Browsers

ADAMS 3.0 supports Internet Explorer 8+, as well as Firefox 3.6+.

ADAMS may work with other browsers and versions, however we recommend using a browser on the above list for better results.

The Safari browser on Macintosh platforms is not officially supported in this version of ADAMS, although most of the issues encountered in the previous version for athlete users have been resolved for Safari Version 5. Should athletes encounter any technical issues while using ADAMS on a Macintosh computer, you may report it to the ADAMS Help Desk and indicate the platform used (operating system and browser versions).

2.1 Clear Browser Cache

If you notice that some screens do not display correctly in the new application, it may be necessary for you to clear your browser cache.

- If you are using Internet Explorer: click Delete Browsing History from the Safety menu in the upper right. Deselect Preserve Favorites website data, select Temporary Internet files, then click Delete.
- If you are using Firefox, select Clear Recent History from the Tools menu (Clear Private Data in older versions). From the Time range to clear: drop-down menu, select Everything. Make sure that only the Cache checkbox is selected. Then click the Clear Now button.

2.2 Verify Bookmark if Any

If you have difficulty logging into ADAMS, it may be because your bookmark for ADAMS is not correct. For access to the production system, ensure that your bookmark is set to:

<https://adams.wada-ama.org>

Remove any extra characters following the URL.

- If you are using Internet Explorer, click the Favorites button on the far left side of the toolbar. Next, right-click the ADAMS bookmark, and select Properties. Ensure that the URL displayed exactly matches the one shown above.
- If you are using Firefox, click the Bookmark menu, right-click the ADAMS bookmark, and select Properties. Ensure that the Location displayed exactly matches the one shown above.

2.2 Allow Pop-Ups

ADAMS uses pop-ups in many of its functions and therefore requires them to be enabled. To enable them:

- If you are using Internet Explorer, select Pop-up Blocker, then Pop-up Blocker Settings from the Tools menu. Make sure that adams.wada-ama.org is shown in the list of Allowed Sites, otherwise type it in the Address of website to allow textbox, then click the Add button.
- If you are using Firefox, select Options from the Tools menu, then select the Content icon at the top. If the Block pop-up windows option is checked, then click the Exceptions... button next to it. Make sure that adams.wada-ama.org is shown in the list of sites, otherwise type it in the Address of web site: textbox, then click the Allow button.

3 ADAMS 3.0

3.1 ADAMS 3.0 Overview

ADAMS 3.0 features the following enhancements:

- A new **Whereabouts User Interface**: see [Section 3.2](#).
- The **Whereabouts Guide**: see [Section 3.2.14](#).
- Other **Whereabouts-related enhancements**: see [Section 3.3](#).
- The **Whereabouts Submission Report** includes enhancements to reflect the new features of the new Whereabouts module: see [Section 3.4](#).
- **Team Management** Enhancements: see [Section 3.5](#)
- Enhancements for **Laboratory** users: see [Section 3.6](#)
- **TUE** enhancements: see [Section 3.7](#)
- Enhancements for the Organization **Administrator**: see [Section 3.8](#)

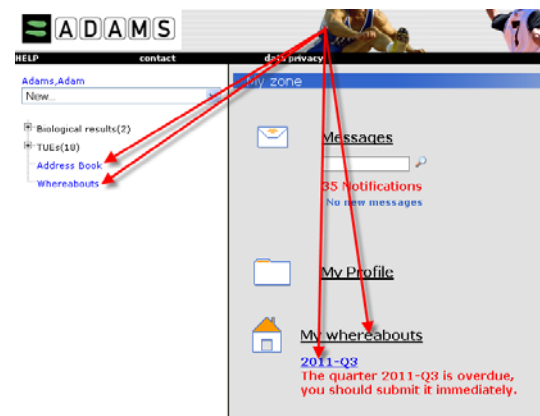

3.2 New Whereabouts User Interface

ADAMS is in the process of redesigning its interface to improve the user experience. Release 3.0 includes the entire whereabouts functionality under this new interface. Its features can be used by athlete and ADO users, including agents and team managers.

This section describes the features of the new interface.

3.2.1 Navigation

The new whereabouts interface is invoked when the user accesses the whereabouts function. Clicking any of the whereabouts links (as shown here) invokes the new interface in a separate browser window.

3.2.2 Banner

The ADAMS banner for the new whereabouts interface is shown at the top of the new screen, every time a user accesses the whereabouts or address book functions.

Athletes see the regular banner:

Other users – including agents and team managers – see a more generic banner:

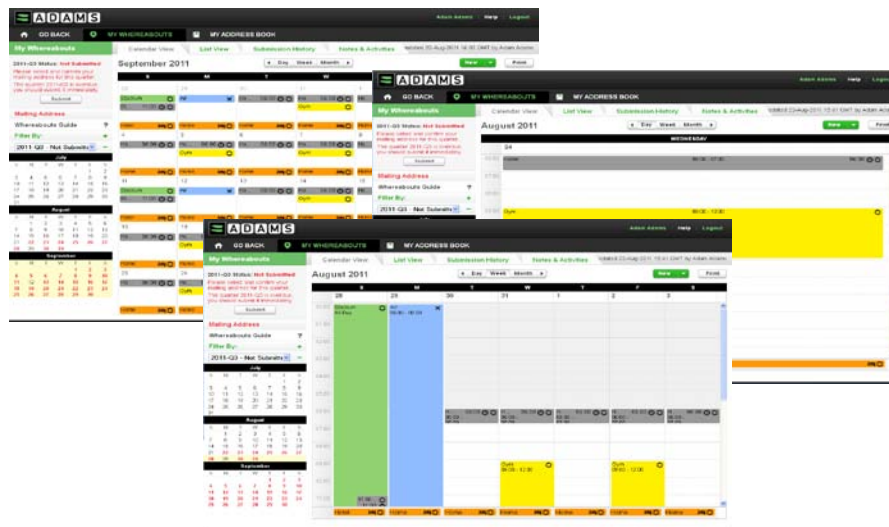

The user can navigate to the whereabouts or Address Book by clicking the links on the navigation bar. Clicking Go Back returns to the original ADAMS interface page. The user can also logout from ADAMS by clicking the link on the extreme right of the banner.

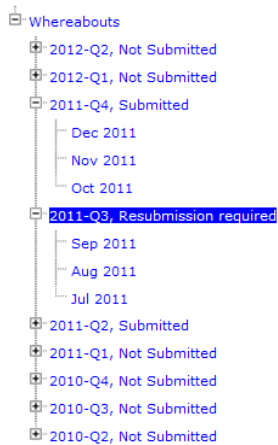

3.2.3 Calendar Views

The new interface features a more intuitive calendar interface, with different views: monthly, weekly and daily. To access a calendar, click the **Calendar View** tab.

The arrows on the side of the calendar view buttons are used to move to the previous or next day/week/month within the selected quarter:

To view a different quarter, click one of the quarter links in the athlete's tree:

...Or use the dropdown on the left panel in the whereabouts page.

3.2.4 Whereabouts Categories

Whereabouts entries are shown on the calendar with the background color corresponding to their category:

- orange for *Overnight Accommodation* (formerly: Daily Overnight Residence),
- green for *Competition*,
- yellow for *Regular Activity* (formerly: Training),
- blue for *Travel* and
- grey for *Other*.

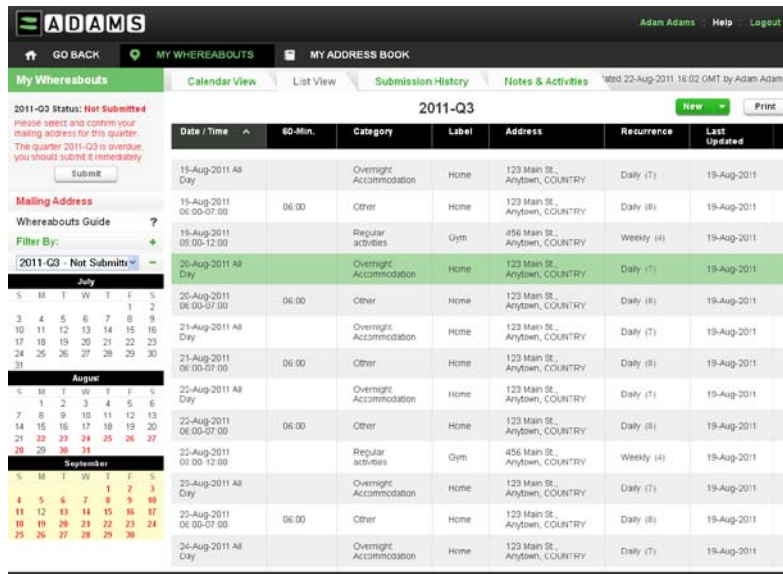

3.2.5 Calendar Icons

- the *Overnight Accommodation* and *Travel* entries are shown with standard right-justified icons ( and .
- *60-minute time slots* are now shown on the whereabouts calendar with a clock icon (.
- *Attachments* are still shown with a paper clip icon (.
- Days containing *modified entries* are flagged with a Modified icon: an orange icon () indicates modified dates, while a red icon () indicates dates modified on the same day.

- **Recurring Whereabouts Entries** are shown on the calendar with a recurrence icon. (🔄). See the **Recurring Entries** section below for more information.

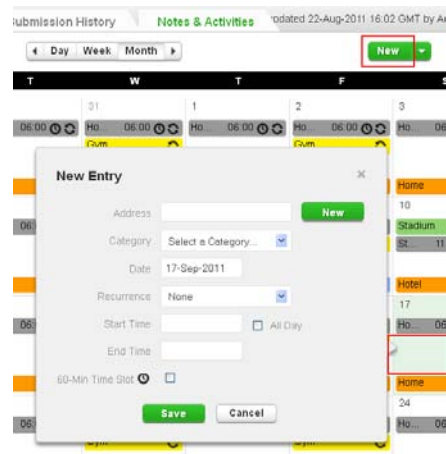

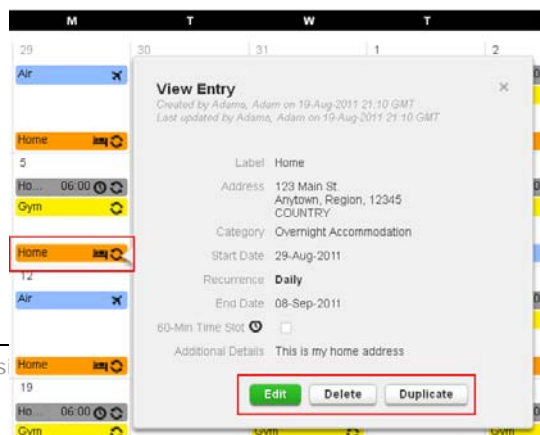

3.2.6 List View

Complementary to the calendar views, a **List View** lets you display, sort and filter all whereabouts entries for the quarter.

3.2.7 Managing Whereabouts Entries

To create a new whereabouts entry, simply click the **New** button (or its arrow for more options) in the upper-right corner of the calendar, or click any blank area in the calendar.

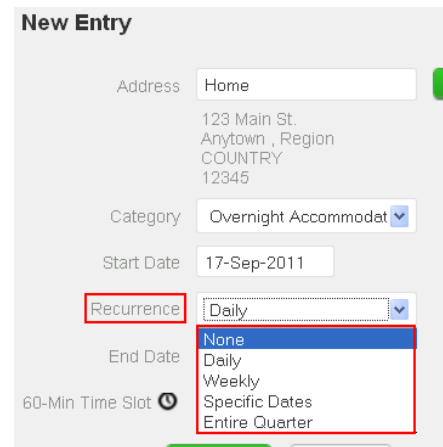

To view, edit, delete or duplicate an entry, click it on the calendar, then click the corresponding buttons at the bottom of the pop-up.

3.2.8 Recurring and Multiple Entries

Recurring Whereabouts Entries can now be created in ADAMS. To create a recurring entry, simply select the type from the Recurrence drop-down list.

The recurrence can be one of the following values:

- **Daily:** the entry will repeat daily, until the end date is reached.
- **Weekly:** the entry will repeat weekly, on selected day of the week, until the end date is reached.
- **Specific Dates:** this option allows you to select individual dates from the calendar. No end date is required.
- **Entire quarter:** same as daily. The end date is by default the last day of the quarter.

The screenshot shows a 'New Entry' form with the following fields and values:

- Address: Home
- 123 Main St
Anytown, Region
COUNTRY
12345
- Category: Overnight Accommodat
- Start Date: 17-Sep-2011
- Recurrence: Daily (selected)
- End Date: (empty)
- 60-Min Time Slot: (toggle icon)

The Recurrence dropdown menu is open, showing the following options: None, Daily, Weekly, Specific Dates, and Entire Quarter.

Multiple entries: you can create a recurring entry, in the monthly or weekly calendar, by **dragging** the mouse across multiple dates. Click on the first date of the series, drag down to the last date of the series, then release the mouse button. The New Entry pop-up will appear with pre-populated start and end dates – and also start and end times, in the weekly calendar.

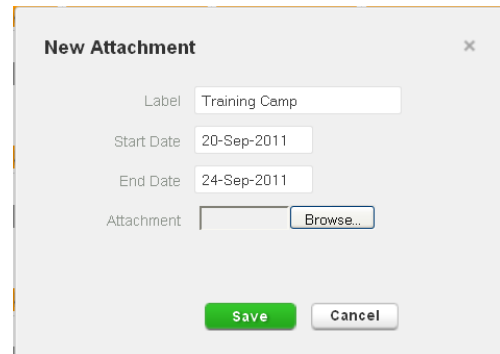

You can also select multiple, non-consecutive dates for a recurring whereabouts entry, by holding down the **control key** while clicking dates on the monthly calendar. Once your selection is complete, release the control key and the New Entry pop-up will appear with the selected dates.

3.2.9 Managing Attachments

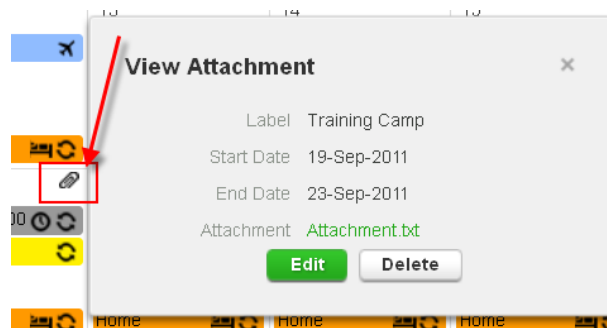

To create an attachment entry, click the arrow next to the **New** button in the upper-right corner of the calendar, and select **New Attachment** from the list.

Next, fill the details in the New Attachment dialog (label, start and end date), click the browse button to select a file, and save. The attachment (paper clip) icon will be shown in the upper-right corner of each day of the date range.

To view or update an attachment, click the paper clip icon:

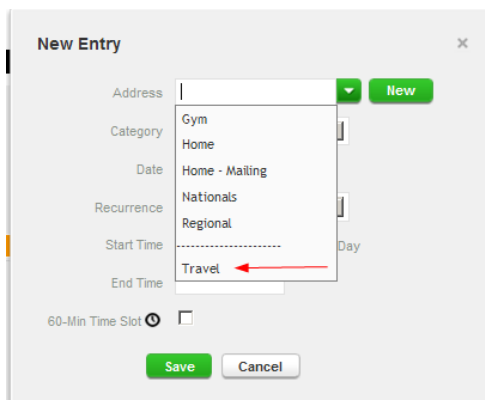

If more than one attachment exists for the selected day, select the attachment from the selection list. Past attachments and SMS attachments cannot be modified.

3.2.10 Travel Entries

Travel entries are a special type of category. A Travel entry indicates that the athlete will be traveling for an extended period of time, and cannot as a result provide a 60-Minute Time Slot or an Overnight Accommodation during that time. This is an exceptional situation and should be first communicated to the custodian organization.

To create a Travel entry, the Travel option, which appear at the bottom of the address drop-down list, must be selected:

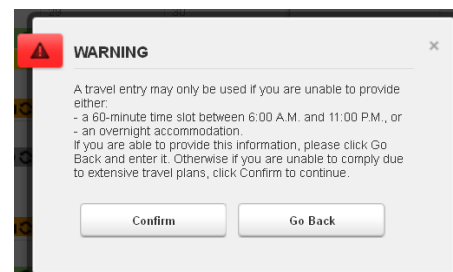

After selecting Travel, a warning message is displayed.

The athlete must confirm that they are unable to provide either a 60-minute time slot or an overnight accommodation.

Once confirmed, one of the following types of travel entry in the Category drop-down must be selected:

- a **Daytime Travel** entry (if the athlete is unable to provide a 60-minute time slot because of extended travel plans), or
- an **Overnight Travel** entry (if the athlete is unable to provide an Overnight Accommodation because of extended travel plans).

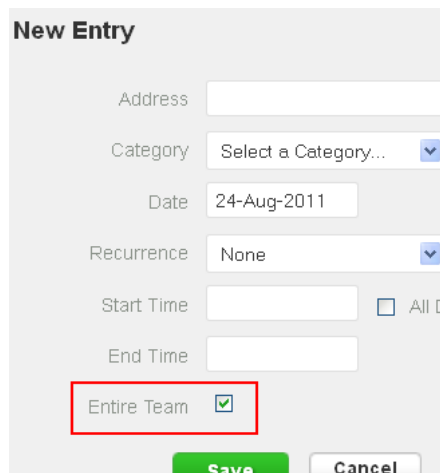

3.2.11 Team Whereabouts

Team whereabouts entries and attachments are created the same way as described in the previous sections. They can be created by users with the team manager role, while accessing a team whereabouts calendar.

For team whereabouts entries, the entry management dialogs (New / Edit Entry) feature an athlete selection list. The same feature is present on the attachment management dialogs (New / View Attachment). The list can be modified to include any athlete, or all athletes in the team.

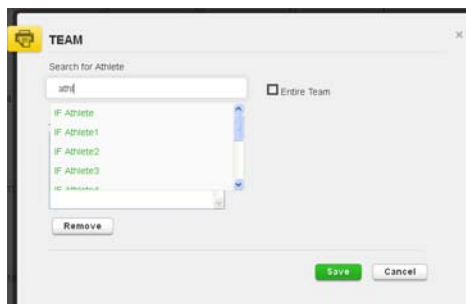

To assign an entry or an attachment to a sub-team, the Entire Team checkbox should be unticked.

The screenshot shows a 'New Entry' dialog box with the following fields and controls:

- Address:
- Category: (dropdown arrow)
- Date:
- Recurrence: (dropdown arrow)
- Start Time: All Day
- End Time:
- Entire Team: (highlighted with a red box)
- Buttons: Save (green), Cancel (grey)

This will bring up the Team dialog, wherein the user can specify the members of the sub-team.

The screenshot shows a 'TEAM' dialog box with the following elements:

- Search for Athlete:
- Entire Team:
- Athlete list: Athlete, Athlete1, Athlete2, Athlete3, Athlete4 (Athlete1 is selected)
- Remove:
- Buttons: Save (green), Cancel (grey)

To search team members to be added to the partial list (sub-team), type into the Search for Athlete box. This will display a list of matching choices. All names matching the search string will appear in the list.

The search string can be any two characters of the first, last or preferred name, or of the ADAMS ID number, or BP, IF, NF or NADO ID number. For example, typing "MA" will display a list of all the male athletes on the team (since "MA" is included in their ADAMS ID#).

You can select a single name from the list by double-clicking the athlete's name, or you can Ctrl-click or Shift-click to select multiple names and then click outside of the list to add those athletes to the sub-team. Click the Save button to save the sub-team selection.

Sub-team entries and attachments appear with a "ST-" prefix on the calendar.

The screenshot displays the ADAMS 3.0 calendar interface for November 2011. The calendar is in 'List View' mode, showing a grid of dates from 30 to 21. A sub-team entry, 'ST-Our gym', is highlighted in yellow on the date 21. A 'View Entry' dialog box is open, showing the details of the entry:

- Label: Our gym
- Address: 234 Main, Montreal, CANADA
- Category: Regular activities
- Date: 21-Nov-2011
- Recurrence: None
- Start Time: All Day
- End Time: (empty)
- Entire Team:
- Mason, Heather; Young, Linda
- Additional Information: (empty)

Buttons for 'Edit', 'Delete', and 'Duplicate' are visible at the bottom of the dialog box.

3.2.12 Mini-Calendar

A mini-calendar, in the left area of the screen, is used to facilitate navigation. Clicking a date in the mini-calendar shows the corresponding date in the main calendar. In the Calendar view, clicking repeatedly the same date toggles the calendar display between monthly, weekly and daily. For RTP athletes, the mini-calendar displays in red all days for which whereabouts requirements are not met. Placing the cursor over the date in error displays a short message for error resolution.

3.2.13 Filter Area

A collapsible filter area, above the mini-calendar, allows you to filter and search specific whereabouts entries in the calendar or list views.

3.2.14 Whereabouts Guide

The Whereabouts Guide, available only for RTP athletes, displays detailed instructions on entering each category of whereabouts as per the International Standard for Testing. Each category is numbered and can be expanded or collapsed.

By default, the Whereabouts Guide is displayed each time the whereabouts page is opened. The user can choose to disable this behavior by un-ticking the "Show this Guide..." checkbox.

3.2.14.1 Whereabouts Guide Step 1 - Introduction

This section contains general information and explanations about whereabouts.

1 Introduction

Welcome to the Whereabouts Guide

This Guide is intended to assist you in providing your whereabouts information in accordance with the anti-doping rules of your sport. The steps outlined in the Guide will show you how to use ADAMS to submit your whereabouts and provide more information about the rationale behind the various requirements. The Guide is always available to you as a checklist for completing your whereabouts submission.

If at any time you wish to leave the guide and begin to enter your whereabouts information, you can click the green **Go to Calendar** button in the upper right hand corner of the screen. You can also go to a specific date by clicking the date on the mini three month calendar on the left hand side of this page.

Why do I need to submit whereabouts information?

By providing your whereabouts information, you are protecting the integrity of your sport and your right to clean and fair competition. The whereabouts information that you provide in ADAMS is used to ensure that testing is planned in the most secure, effective, coordinated, and efficient manner.

In order to be most effective in detecting and deterring doping, out-of-competition doping controls must be conducted without advance notice. This is particularly important given that many prohibited substances and methods are detectable in an athlete's body for a limited period of time while still maintaining a performance-enhancing effect.

Do I have to provide detailed information for every hour of the day?

The whereabouts information you provide will give authorized anti-doping organizations a general picture of your location for the next three months (the quarter). A specific one hour location (60-minute time slot) each day is also required. This not only ensures that you can be located for testing when necessary, but reinforces the value of all other information provided. By capturing your general activities throughout the day and quarter rather than itemizing every movement you make, your anti-doping organization can plan the most effective possible tests that also consider your privacy and preferences.

It is your responsibility to ensure that all information provided is accurate and up-to-date at all times. Please remember that although you are asked for specific information as outlined under the rules of your sport and in this Guide, you may still be tested at anytime and anywhere.

Where can I find more information about whereabouts?

For more information on the possible consequences of failure to provide this information or for being unavailable for testing at your designated 60-minute time slot, please contact your whereabouts custodian organization, which is listed in the security section in "My Profile". This anti-doping organization should also provide you with more information regarding your rights and responsibilities with respect to whereabouts information.

3.2.14.2 Whereabouts Guide Step 2 - Mailing Address

This section contains information on how to provide a mailing address for the quarter.

2 Mailing Address Click here to select and confirm your mailing address for this quarter.

Why do I need to provide my mailing address?

You need to provide a mailing address that may be used by your anti-doping organization for the purposes of formal written correspondence in the event you fail to comply with the whereabouts rules. It may or may not be the same as your home address. This should be an address where you are certain that any mail will be brought to your attention immediately. Any correspondence sent to this address will be considered as having been delivered, at the latest, five days after it has been sent. Therefore, if you travel regularly, you may wish to indicate the address of someone, such as an agent or family member, who will be available to receive the mail and bring it to your attention. This address may need to be updated on occasion as well.

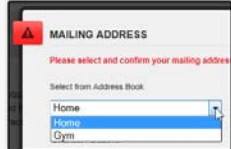

How do I provide this information in ADAMS?

- Click the Mailing Address link in the Quarter Area.

The screenshot shows a sidebar menu with 'My Whereabouts' at the top. Below it, there's a section for '2010-Q4' with a status of 'Not Submitted' and a 'Submit' button. The 'Mailing Address' link is highlighted with a mouse cursor. Other links include 'Whereabouts Guide', 'Filter By:', and '2010-Q4' with a calendar icon.

- In the Mailing Address dialog, you can select another address from the drop-down list, or select "New Address" to create a new one.

The dialog box has a red warning icon and the title 'MAILING ADDRESS'. It contains the text 'Please select and confirm your mailing address' and a dropdown menu labeled 'Select from Address Book'. The dropdown menu shows 'Home' selected, with 'Home' and 'Gym' as other options.

- Once a valid mailing address is selected, please confirm it by ticking the "I confirm..." checkbox.

Your mailing address information is entered in your profile section. You can click My Profile to access it. Once entered, you need to confirm the address every quarter, by ticking the "I confirm..." checkbox in the Mailing Address section on the left. If your mailing address changes over the course of the quarter, please update it. For more information, consult the [Online Help](#).

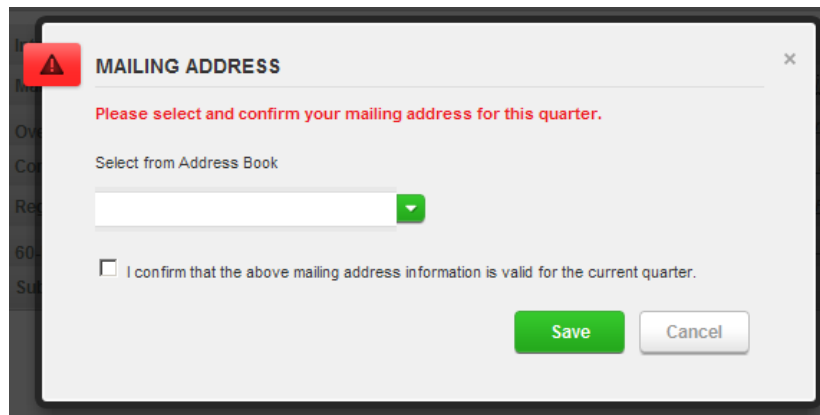

Clicking the Mailing Address link on the side of the whereabouts page will display the Mailing Address dialog.

Alternatively, if a mailing address has not yet been provided, the user can click the link in the section header:

The mailing address dialog allows the user to select a mailing address for the quarter:

If the athlete has defined a mailing address in their profile page, then it will be selected by default when viewing the Mailing Address dialog for the first time that quarter. However, the athlete still needs to confirm the address by ticking the confirmation checkbox.

3.2.14.3 Whereabouts Guide Step 3 - Overnight Accommodation

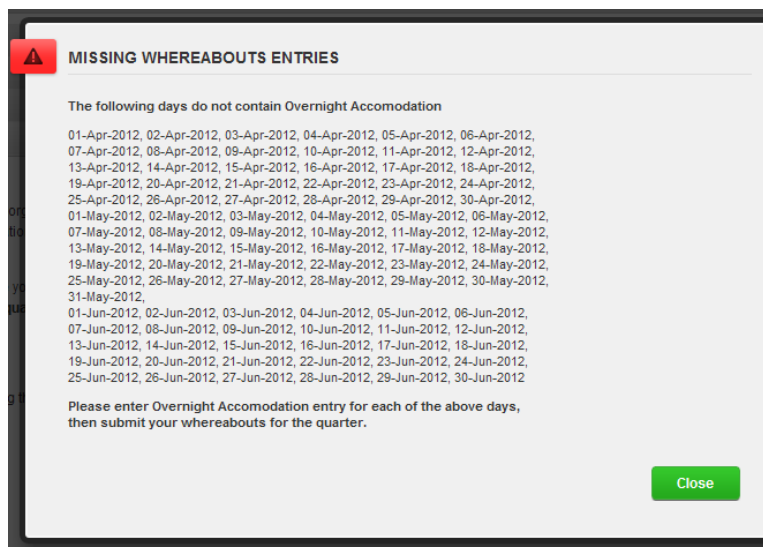

Athletes are required to provide an Overnight Accommodation entry for every day of the quarter. This section describes the steps to take in order to do so and also explains Travel entries.

In version 2.3 of ADAMS, these entries were called Daily (Overnight) Residence. The upgrade from 2.3 to 3.0 converts these entries into the new Overnight Accommodation category.

If one or more days in the quarter do not have an Overnight Accommodation entry, then the header will have the red icon.

Clicking the link will display a dialog with the list of dates that are missing such entries.

3.2.14.4 Whereabouts Guide Step 4 - Competition Categories

RTP Athletes must enter at least one Competition category entry for a quarter before submitting.

If the athlete is not participating in any competitions in the quarter, then they must mark the category as not applicable by either clicking the link inside the Competition section of the Whereabouts Guide, or by clicking the link in the header.

4 Competition [Click here if you have no Competition this quarter.](#)

Why do I need to tell you about my competitions?
Providing details of your competition schedule helps your anti-doping organization plan effective out-of-competition tests and allows anti-doping organizations (for example your National Anti-Doping Organization and your International Sport Federation) to better coordinate their testing programs, reducing unnecessary duplication in testing.

What information am I required to provide?
For the quarter, include the name and address of each location where you are scheduled to compete and the date(s) you are scheduled to compete. If you have no competitions this quarter, you may indicate this by clicking the link **No competition this quarter?**, then ticking the checkbox and entering a valid reason why you have no competition(s).

How do I provide this information in ADAMS?
To add a competition entry:

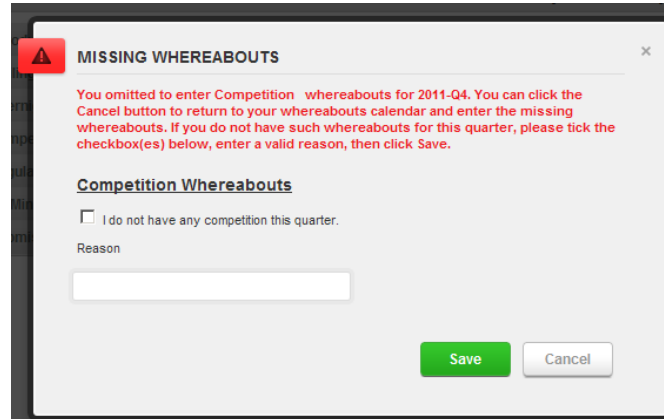

1. Create a new entry by clicking a date in the **calendar** or by using the **New** button.

2. In the **New Entry** pop-up:
Select an address.
Select the **Competition** category.
Then enter any other relevant detail (such as date or recurrence; by default, competitions are considered "All day" events)

3. Click the **Save** button.

The competition entry will appear on the selected day(s) on the **calendar**, with a green background.
No competition this quarter? [Click here](#) to mark the category as non-applicable.

This will bring up the Missing Whereabouts dialog:

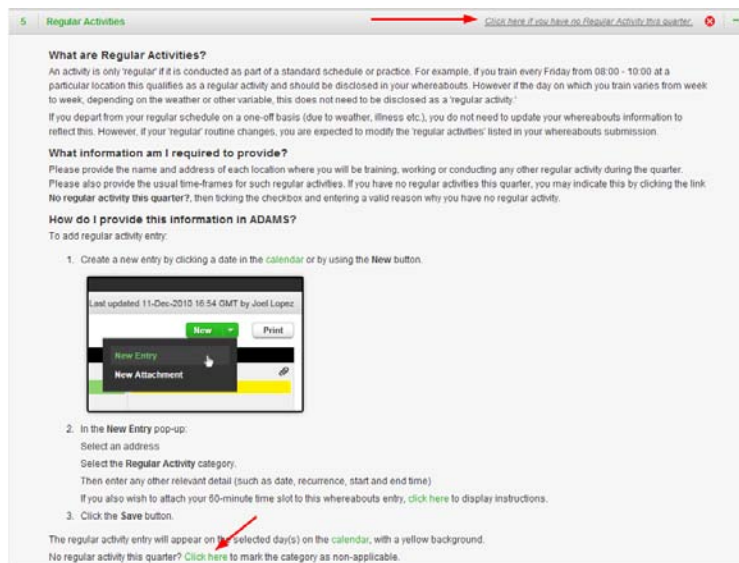

The athlete must confirm that they do not have any competition this quarter and give a reason. Once completed, the user may submit the quarter without a competition entry.

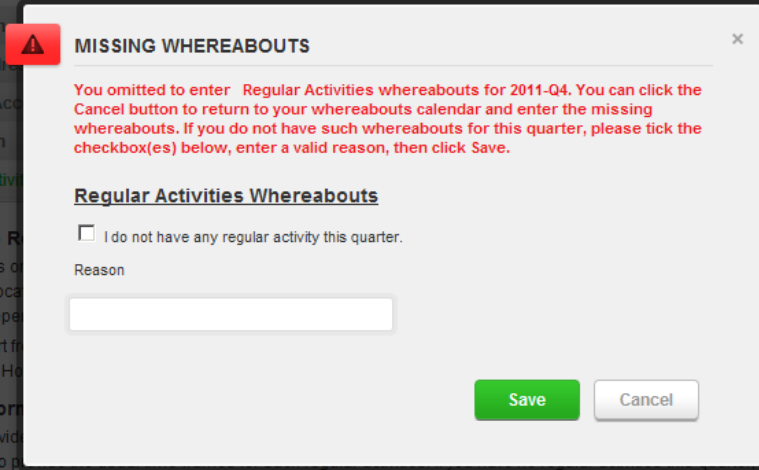

If the athlete had the Competition location descriptor set as Not Applicable for the quarter in 2.3, the upgrade to 3.0 will automatically set the checkbox as well as copy the reason, for the quarter.

3.2.14.5 Whereabouts Guide Step 5 - Regular Activities

RTP athletes must enter at least one Regular Activity entry for the quarter. Otherwise they must declare this category as not applicable by clicking either the link in the Regular Activities section of the Whereabouts Guide, or by clicking the link in the section header.

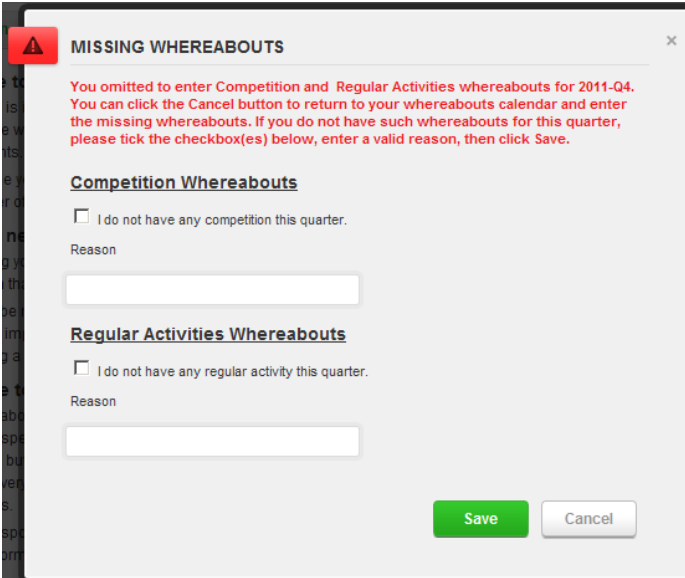

This will bring up the missing whereabouts dialog for Regular Activities.

The screenshot shows a dialog box titled "MISSING WHEREABOUTS" with a red warning icon. The text inside reads: "You omitted to enter Regular Activities whereabouts for 2011-Q4. You can click the Cancel button to return to your whereabouts calendar and enter the missing whereabouts. If you do not have such whereabouts for this quarter, please tick the checkbox(es) below, enter a valid reason, then click Save." Below this text is a section titled "Regular Activities Whereabouts" containing a checkbox labeled "I do not have any regular activity this quarter." and a text input field labeled "Reason". At the bottom right are "Save" and "Cancel" buttons.

The athlete must confirm that they do not have any Regular Activities for the quarter and provide a reason. Once completed, the user may submit the quarter without a Regular Activity entry.

If the user is missing both a Competition and Regular Activities entry, the Missing Whereabouts dialog will display both checkboxes in the same window.

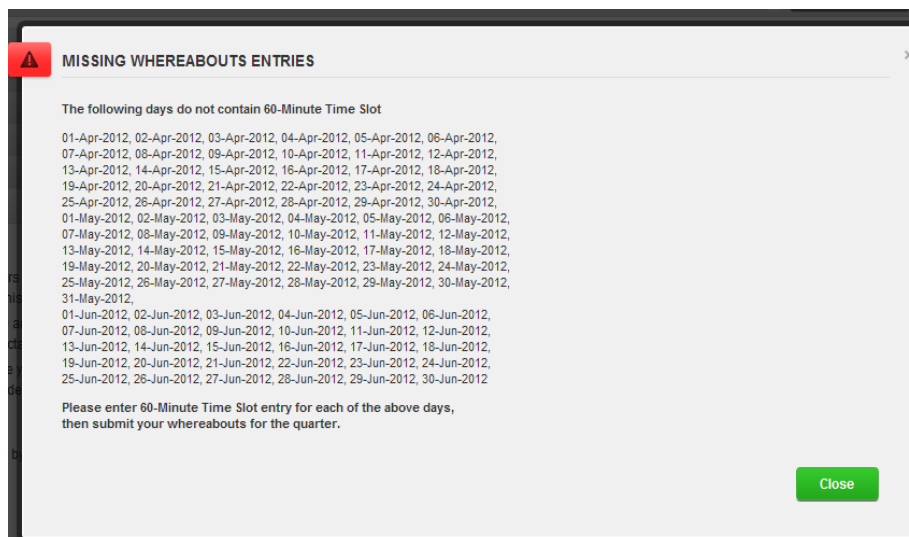

The screenshot shows a dialog box titled "MISSING WHEREABOUTS" with a red warning icon. The text inside reads: "You omitted to enter Competition and Regular Activities whereabouts for 2011-Q4. You can click the Cancel button to return to your whereabouts calendar and enter the missing whereabouts. If you do not have such whereabouts for this quarter, please tick the checkbox(es) below, enter a valid reason, then click Save." Below this text are two sections: "Competition Whereabouts" and "Regular Activities Whereabouts". Each section contains a checkbox labeled "I do not have any [activity] this quarter." and a text input field labeled "Reason". At the bottom right are "Save" and "Cancel" buttons.

3.2.14.6 Whereabouts Guide Step 6 - 60-Minute Time Slot

RTP Athletes must provide a 60-Minute Time Slot each day of the quarter. This section of the Whereabouts Guide describes the way to complete this requirement, as well as how to enter Travel entries as possible exceptions to this rule. In some cases, there may be additional exceptions to this rule – please refer to the explanations within the Whereabouts Guide.

Clicking the link on the header will display a popup listing the days that are missing a 60-Minute Time Slot entry.

3.2.14.7 Whereabouts Guide Step 7 - Submission

This last section addresses the whereabouts submission process.

7 | Submission

What if I'm not yet sure about my exact whereabouts information?

It is acknowledged that you may not know, at the beginning of the quarter, precisely what your whereabouts will be for each day in the quarter. You should provide the best information you have at the time and then update it regularly as soon as more details become available or are confirmed.

Before submitting your whereabouts information for the quarter, please consider carefully that it is complete and accurate and will provide doping control personnel with the information necessary to locate you for testing. Failure to disclose your whereabouts in accordance with the requirements outlined in this Guide and the rules of your sport may lead to a possible anti-doping rule violation with significant consequences. Please ensure therefore that you keep your whereabouts up-to-date and that you understand your rights and responsibilities in providing this information.

How do I submit my information in ADAMS?

- Click the **Submit** button in the upper-left area of the screen

My Whereabouts

2010-Q4 Status: **Not Submitted**

2010-Q4 Whereabouts are overdue. Please submit immediately.

Mailing Address

1

2

- The status for the quarter will appear as **Submitted**

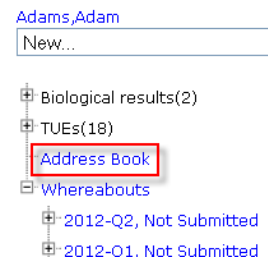

I am having problems submitting my whereabouts information.

You may need to make corrections to some days in your [calendar](#) if the above requirements have not been met. Days with an error or that are missing information will appear in red in the mini-calendar on the left. If you place your cursor above any of these red dates, a message will appear to indicate what issue needs to be resolved. You can also look for warning messages and icons on each step of this Guide as you go through it.

[Thank you for your cooperation and your support of doping-free sport.](#)

3.2.15 Address Book

A new **Address Book** replaces the list of location descriptors. It can be accessed by clicking the Address Book link, which is located above the Whereabouts link of the Athlete Tree, in the original interface window.

Clicking the link will display the Address Book page, in a new ADAMS 3.0 window.

The screenshot shows the 'My Address Book' page in ADAMS 3.0. The page has a header with the ADAMS logo and navigation links: 'GO BACK', 'MY WHEREABOUTS', and 'MY ADDRESS BOOK'. Below the header is a table with the following columns: Label, Address, City, Region, Country, Postal code/Zip, Phone, Last Used, and a delete icon (X). The table contains several entries, with the 'Hotel' entry highlighted in green.

Label	Address	City	Region	Country	Postal code/Zip	Phone	Last Used	
Gym	456 Main St.	Anytown	Region	COUNTRY				X
Home	123 Main St.	Anytown	Region	COUNTRY	12345	000.123.4567		X
Hotel	852 Hotel Ln	Competition City	Region	COUNTRY				X
Mom	789 Other St.	Other town	Region	COUNTRY	123456	000.321.7654		X
Pool	147 Some St.	Anytown	Region	COUNTRY				X
Stadium	663 Stadium Place	Competition City	Region	COUNTRY				X

The page shows a tabulated list of all entries in the Address Book. The Last Used column is updated every time the whereabouts are submitted, and indicates the latest date, if any, when each specific address is used.

Each team in ADAMS also has an address book, which can be used for the team whereabouts.

3.2.15.1 Conversion of Location Descriptors to Addresses

The upgrade from ADAMS 2.3 to 3.0 automatically converts each Location Descriptor into an address. If multiple quarters have a location descriptor with the same name, then index numbers are appended, so as to differentiate the address labels.

3.2.15.2 *Creating an Address*

Clicking the New button, in the upper-right corner of the Address Book page, invokes the New Address dialog.

3.2.15.3 *Modifying an Address*

To modify an address, click the address entry in the list, enter the modified information and save. All current and future entries in the whereabouts calendar will be modified accordingly.

3.2.15.4 *Deleting an Address*

The delete ("x") icon, located in the rightmost column of the corresponding address, is used to delete an address. A dialog box will first appear. Upon confirmation, all current and future whereabouts entries related to the address being deleted will be removed from the whereabouts calendar.

3.2.16 *Demographic Page*

The address section in the athlete's demographic page now contains a mailing address only. The data will be saved as an address in the Address Book and will be shown as the default mailing address in the Whereabouts Guide.

New Mailing Address

After creating the new address, it will automatically be selected and saved as the mailing address.

Mailing Address

Please select your mailing address:

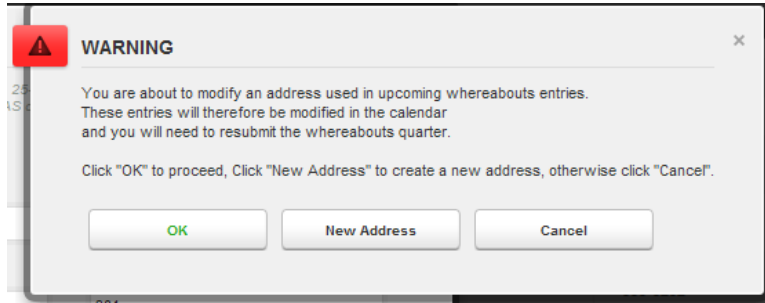

Home

321 Main
Montreal , Quebec
CANADA
H1H 1H1

Clicking the edit button will allow the user to modify the address on the athlete profile page, without accessing the address book. If the mailing address is also used in the calendar for whereabouts entries, a warning popup will appear:

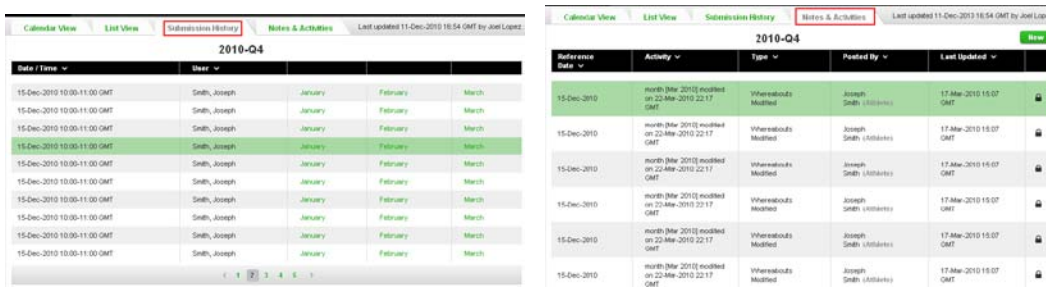

A similar warning is displayed in the Address Book, if the user edits an address that is used in the whereabouts calendar:

3.2.17 Submission History, Notes & Activities

The **Submission History** and **Notes & Activities** views are still available in ADAMS 3.0, under their own tabs.

3.2.18 Whereabouts Details Report

The layout of the whereabouts Details Report was also enhanced to reflect the new look & feel of the system.

3.3 Other Whereabouts-Related Enhancements

3.3.1 First Day of the Week

In the User preferences, it is now possible to select the first day of the week for the whereabouts calendar. To access the User Preferences, click the user name on the banner, in the classic ADAMS interface. The first day of the week can be either Sunday or Monday. The default value is defined by each organization administrator.

3.3.2 SMS Whereabouts – No Resubmission

SMS whereabouts entries added to an athlete calendar no longer require resubmission of the quarter.

3.3.3 Whereabouts Validation – RTP Inclusion

Whereabouts rules validation is now performed only when RTP inclusion dates are effective. When an athlete is included in a Registered Testing Pool, it is possible to define inclusion dates:

Test Pool				
	Name	Rank	Start Date	End Date
<input checked="" type="checkbox"/>	International	1	01-Jan-2012	31-Mar-2012
<input checked="" type="checkbox"/>	Other	1		

Whereabouts rules will be validated for National and International RTP athletes, only if the quarter overlaps the inclusion date range. For example, if an athlete is included in an International RTP for the first quarter (January through March), and submits in March the whereabouts for the second quarter, then the whereabouts rules will not apply.

3.4 Whereabouts Submission Report

The Whereabouts Submission report includes enhancements to reflect the features of the new Whereabouts module:

- The Respect Rule column will indicate the conditions related to the IST:
 - **YES:** the athlete met all IST requirements
 - **Travel:** the athlete does not meet all IST requirements because of at least one travel whereabouts entry.
 - **In-Comp:** the athlete does not meet all IST requirements because at least one competition whereabouts entry was entered.
 - **Mailing Address:** the athlete did not confirm their mailing address
- Additional filters (Athlete and Submission status) will be added to the report to allow showing only athletes whose whereabouts situation corresponds to one of the above conditions.

3.5 Team Management Enhancements

Some enhancements were made to facilitate the way teams are managed in ADAMS. These changes introduce the flexibility required for future reporting functionality.

3.5.1 Team Composition History

Whenever athletes are added to or removed from a team, ADAMS now retains the team composition history. New columns, **Added to Team** and **Removed from Team**, show dates when the team composition changed. The athletes not currently on the team are listed at the bottom of the list with a darker background color:

The screenshot shows the 'Whereabouts Team/Group Management' interface. At the top, there are buttons for 'cancel', 'edit', 'correct', 'retire', and 'export'. Below these are fields for 'Team/Group Name*' (IF Team 3) and 'Team/Group Description' (This is the IF Team 3). There are also sections for 'Access list' (Public Access, Who has access) and 'Team managers' (IF, TeamManager2). At the bottom, there is a table with tabs for 'Athletes', 'Contact', and 'Activities(5)'. The 'Athletes' tab is active, showing a table with columns: Athlete, Sport-Discipline, Gender, Added to Team, and Removed from Team.

Athlete	Sport-Discipline	Gender	Added to Team	Removed from Team
Athlete3, IF	Sport - Discipline	Male	03-Jun-2011	N/A
Athlete5, IF	Sport - Discipline	Male	03-Jun-2011	N/A
Athlete1, IF	Sport - Discipline	Male	03-Jun-2011	N/A
Athlete9, IF	Sport - Discipline	Male	03-Jun-2011	07-Jun-2011
Athlete7, IF	Sport - Discipline	Male	03-Jun-2011	07-Jun-2011

If the athlete is removed and then reinstated on a different day, a new line for the athlete will appear in the list with the date they were added.

Athletes		Contact	Activities(3)		
add athlete		advanced search			
<input type="checkbox"/> Select all	Athlete	Sport-Discipline	Gender	Added to Team	Removed from Team
<input type="checkbox"/>	cces, ath2	Underwater Sports - Apnoea	X(Unknown)	28-Mar-2011	N/A
<input type="checkbox"/>	Smith, Gary	Aquatics - Water Polo	Male	28-Mar-2011	N/A
<input type="checkbox"/>	East, Genevieve	Luge - Luge	Female	28-Mar-2011	N/A
<input type="checkbox"/>	Jetson, George	Gymnastics	Male	28-Mar-2011	N/A
<input type="checkbox"/>	Smith, Wayne	Aquatics - Synchronized Swimming	Male	29-Mar-2011	N/A
<input type="checkbox"/>	Smith, Wayne	Aquatics - Synchronized Swimming	Male	28-Mar-2011	28-Mar-2011
<input type="checkbox"/>	Gérard, Tanguay	Archery	Male	28-Mar-2011	28-Mar-2011

If the athlete is removed and added on the same day, the dark grey line will be removed and the athlete will be displayed as if they were never removed.

The **Activities** tab also keeps track of any change of composition in the team:

status change	IF, User	03-Jun-2011 18:24 GMT	+

3.5.2 Team / Group Deletion

ADAMS now requires the corrector role privileges to delete teams. Users with the corrector role can click the **correct** button, select the delete option and enter a reason before the team is deleted:

After entering a reason, the team will be deleted from the system. Once a team is deleted, the user group that was associated to that team still exists, and can be edited by the organization administrator.

3.5.3 Team / Group Retiring

It is now possible to retire a team, by clicking the **retire** button:

A confirmation pop-up will appear.

When a team is retired, all current and future whereabouts are removed from ADAMS. Past whereabouts are left unchanged. It is also possible to unretire a retired team, however this action does not bring back the team whereabouts entries that existed prior to retirement.

Retired teams show a caption under their name, in the left column and on the team page; the **retire** button is also shown as **unretire**:

The Activities tab also keeps track of any change of team status:

Reference date	Activity	Type	Posted by
08-Jun-2011	Team retired	status change	IF, User

By default, retired teams are shown at the bottom of the list, when performing a search:

	Creation Date	Team/Group Name	Team/Group Description	No. of Athletes	Status	
<input type="checkbox"/>	03-Jun-2011	IF Team 1	This is the IF Team 1	8	Active	Edit
<input type="checkbox"/>	03-Jun-2011	IF Team 3	This is the IF Team 3	3	Active	Edit
<input checked="" type="checkbox"/>	03-Jun-2011	IF Team 2	This is the IF Team 2	3	Retired	Edit

3.5.4 Team / Group Bulk Update

It is now possible to perform two types of updates to a series of non-retired teams in ADAMS:

- add or remove an ADAMS user to the access list of the team, or make the teams available for public access (i.e. give access to all users of the organization who created the teams);
- add or remove a team manager.

The bulk update is initiated on the **Whereabouts Team/Group Management** page, by selecting teams and clicking the **bulk edit** button:

Whereabouts Team/Group Management create cancel

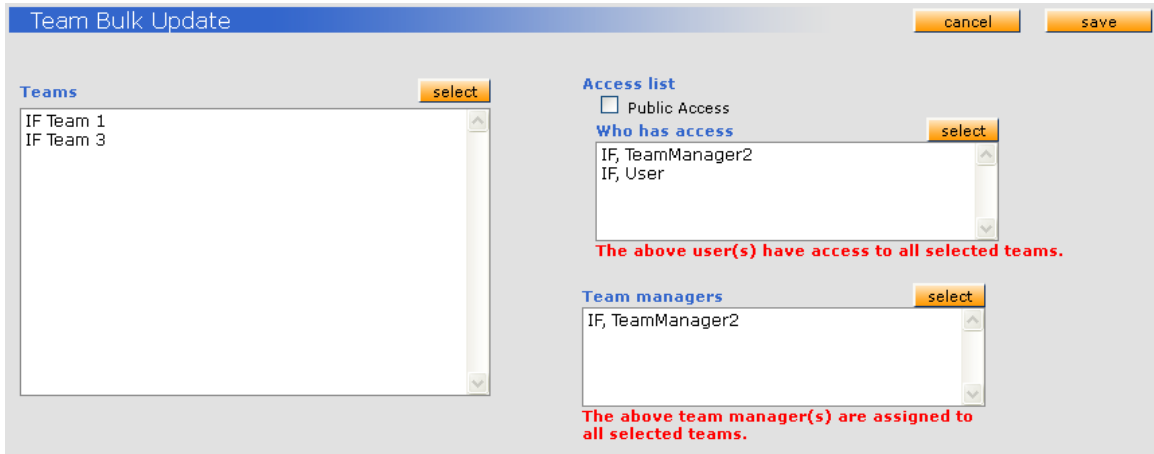

Enter the group name or leave blank for all groups.
 search -

Sport/Discipline - **Team managers** select

Select all bulk edit

	Creation Date	Team/Group Name	Team/Group Description	No. of Athletes	Status	
<input checked="" type="checkbox"/>	03-Jun-2011	IF Team 1	This is the IF Team 1	8	Active	Edit
<input checked="" type="checkbox"/>	03-Jun-2011	IF Team 3	This is the IF Team 3	3	Active	Edit
<input type="checkbox"/>	03-Jun-2011	IF Team 2	This is the IF Team 2	3	Retired	Edit

In the Team Bulk Update screen, it is possible to select or unselect teams from the list. The access list and Team managers boxes show the values common to all selected teams. Any action (adding or removing a username on the access list or the team manager list, or setting the team as public) will be applied to all selected teams.

3.6 Enhancements for Laboratory Users

Various enhancements have been introduced in ADAMS 3.0 for Laboratory users, affecting the reporting functionality of Routine analytical results as well as of EQAS findings. Some improvements apply to both types of results (2.6.1, 2.6.2, 2.6.3) whereas others are specific for the Routine samples (2.6.4 - 2.6.9) and again others solely relevant for the EQAS results (2.6.10 – 2.6.12). The key features are described below.

3.6.1 Check on Duplicate Entries

It is possible that two (or more) different laboratories are entering the exact sample code/type in ADAMS. Since in practice different manufacturers exist with their own particular numbering system, it could sometimes occur that coincidentally the same number is used by these manufacturers.

ADAMS checks on duplicate entries of analytical results whenever they are created. Upon entering a sample code in ADAMS where this code already exists in ADAMS, a “possible duplicate”- warning will be displayed, as in the example:

The screenshot shows the ADAMS Lab Results form. At the top, there is a header bar with 'data privacy' on the left and 'TESTLAB_User?_IName TESTLAB_User?_IName from TESTLAB' on the right. Below the header, there are buttons for 'Cancel', 'Save', and 'Auto-Complete'. A red arrow points to the 'Save' button. A warning message 'Possible duplicates:' is displayed in red text. Below this warning is a table with the following data:

Sample Code	Sample A/B	Creator	Lab	Creation Date
same99	A	WADA - World Anti-Doping Agency	LAB-Montreal-CAD-INRS - Laboratoire de contrôle du dopage	15-Oct-2010 15:00 GMT

Below the table, there are several input fields for the current entry:

- Sample Code* (text input): same99
- Sample Collection Date (date input):
- Country (dropdown menu):
- Lab Reference # (text input):
- Sample Type* (dropdown menu): Urine
- Region (dropdown menu):
- Mission Order (text input):
- Sample A/B (dropdown menu): Sample A
- City (text input):

At the bottom of the form, there are fields for 'Specific gravity', 'pH', and 'Screen T/E Ratio'.

In ADAMS 3.0 the duplication check will be made on a combination of 4 parameters: Sample code, Sample type (urine/blood), Lab name and Date received by lab. In case the sample code and sample type are the same, but the Lab name and/or the Date received by Lab is different, it is possible to enforce the data-entry of the result despite the warning-message shown. Simply clicking on the Save-button on top of the page and disregarding the warning message would suffice.

Data-entry will be hampered though and prevented by ADAMS if the same lab enters the same sample code/type and the same Date received (assuming it is not the B sample).

3.6.2 Detection of Merely Metabolites

It will be possible to indicate that only metabolite(s) were detected during the analysis (and not the parent). The *Only metabolite(s)* checkbox can be utilized for this purpose. The PDF Test report (produced by dint of the *Print analysis result record- button*) will clearly reflect this result information.

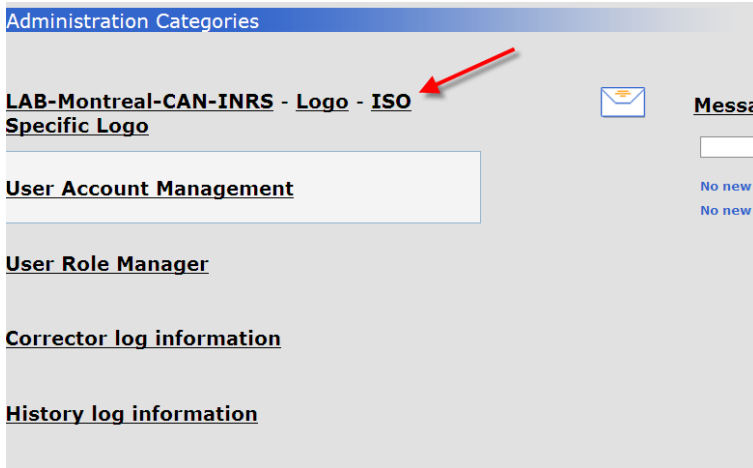

When the box is checked, at least one metabolite in combination with a substance/class has to be specified at the time of (partial) Submission.

The screenshot shows a data entry form for a finding. At the top, there are three fields: 'Class' with a dropdown menu showing 'M1. Oxygen Transfer Enhancement', 'Only metabolite(s)' with a checked checkbox, and 'Date Results Reported' with a date picker set to '15-Mar-2011'. Below this, there are three columns: 'Metabolite' with a text input field containing 'Metabolite 1', 'Estimated' with a text input field containing '2', and 'Concentration/Ratio' with a dropdown menu showing 'IU/L'. An 'add metabolite' button is located below these fields. Underneath, there are two columns: 'Substance*' with a dropdown menu showing 'Blood doping (Other)' and 'Estimated' with a text input field containing '1' and a dropdown menu showing 'IU/L'. An 'add substance' button is located below these fields. At the bottom, there is a text area labeled 'Details Concerning Finding'.

3.6.3 Uploading a Lab-Specific ISO Logo

The PDF Test report will present a few enhancements, amongst which a reserved space in the header to display any Lab-specific ISO logo that was uploaded by the Lab.

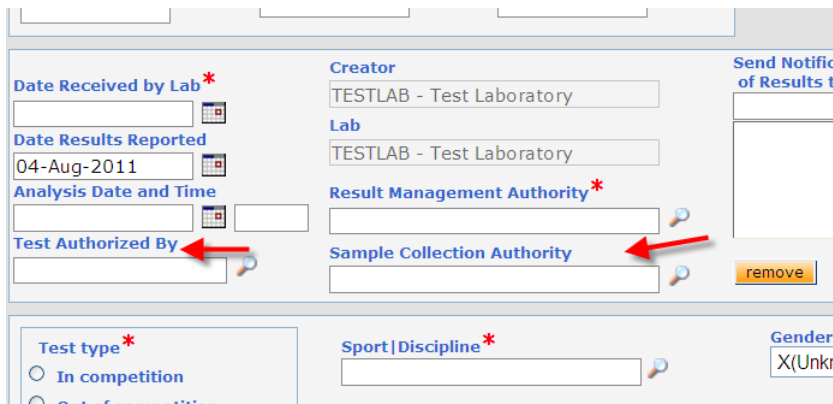

The upload facility is available in the *Administration* module within the Organization settings.

Routine Samples - Specific:

3.6.4 Include Testing/Sample Collection Authority in the Result

In accordance with the new Doping Control Form contents, the report possibility for Laboratories will be expanded to include the Sample Collection Authority and the Test Authority as well, as optional information.

3.6.5 Reporting Threshold Substances & Steroid Profile Variables

The Lab results data-entry page will facilitate the completion of a mean concentration/ standard uncertainty for threshold substances, as well as the reporting of steroid profile variables.

If a specific so-called *Threshold substance* (e.g. "morphine > DL of 1.2 µg/mL") is selected when Adding a substance, then automatically the concentration/uncertainty section appears, which can be completed:

The screenshot shows a web-based data entry form. At the top, there are three main sections: 'Class' with a dropdown menu set to 'S7. Narcotics', 'Only metabolite(s)' with an unchecked checkbox, and 'Date Results Reported' with a date picker set to '04-Aug-2011'. Below these is an 'add metabolite' button. The main section is titled 'Substance*' and features a dropdown menu with 'morphine > DL of 1.2 µg/mL' selected. To the right of this is an 'Estimated' dropdown menu. Below the substance dropdown are two rows of input fields: 'The mean concentration measured is' and 'The combined standard uncertainty (uc) estimated by the Laboratory at the threshold is +/-'. A red arrow points to the 'uc' field. Below this is a 'Details Concerning Finding' text area. At the bottom of the main section is an 'add substance' button. Below that is a section for 'Steroid Profile Variables' with an unchecked checkbox. A red arrow points to this checkbox. At the very bottom of the form are 'cancel' and 'save' buttons.

For the reporting of endogenous steroids (steroid profile data) a dedicated section *Steroid Profile Variables* can be used. Checking the box opens the input fields:

<input checked="" type="checkbox"/> Steroid Profile Variables		
5 α -androstenediol	<input type="text"/>	ng/mL
5 β -androstenediol	<input type="text"/>	ng/mL
androsterone	<input type="text"/>	ng/mL
epitestosterone	<input type="text"/>	ng/mL
etiocholanolone	<input type="text"/>	ng/mL
testosterone	<input type="text"/>	ng/mL

cancel save

The data-entry is optional, yet when a value is entered and saved the *Specific Gravity* field becomes mandatory for Urine samples upon (partial) Submission of the result.

3.6.6 Updating Comments upon Partial Submission

Partial submission will now allow modifications of the comments fields (Analysis details/Explanation/Opinion and Details concerning finding).

Once the lab result is (partially) *submitted* by the lab, everything in the lab result is editable by the lab until the lab result gets matched with a DCF that exists in ADAMS with the same sample code/type and sport discipline.

Once *submitted and matched*, the lab result record is partially locked, only allowing more details to be added, yet not to remove or to modify existing data. If the *Edit*-button on the top of the page is clicked, one will find that particular fields are open to input. To be precise, the following additions are possible in that case:

- If "specific gravity" / "PH" / "Screen T/E Ratio" fields for a urine sample do not have a value, it is possible to set one. Then they are locked.
- New substance(s) can be added;
- New metabolite(s) can be added;
- New monitored substances can be added;
- Add an analysis (but not remove);
- New screening results can be added;

- IRMS checkboxes can be changed;
- New activities can be added;
- "Send results to:" list of organization is not locked. So the user can add/remove organisations into this list, even if matched (warning messages are displayed on submission).

AND

now in Release 3.0, if the result was ***Partially submitted*** and matched

ALSO:

- Analysis details/Explanation/opinion is Editable
- Details concerning finding is Editable

When the result status changes from Partially Submitted to Submitted these comments are included in the Activity entry created in the Activities tab.

If there is a need to modify/remove *existing* details in the submitted and matched result, then the relevant RMA for the sample has to be contacted. The RMA is in the position to 'break' the match (the RMA actually should go to the DCF of the athlete, clicking on the Result at the bottom of the page, click on No –Reject Match). Hereafter the Lab user will be able to apply the adjustments to the result record, Save and re-submit it.

3.6.7 Change an ATF Test result

If Lab users want to finalize any further investigation done on the sample and want to indicate its outcomes, they are now in the position to change the *Test Result* from an Atypical Finding (ATF) result into a Negative or AAF. This can be done without the requirement of breaking the match by the RMA.

- Test result ATF → Negative
- Test result ATF → AAF

At this transition the *Test Result Reason* becomes mandatory. An Activity entry will automatically be created in the *Activities* tab recording the changes (when/who) and the Test result reason. Also a notification will be sent to the RMA indicating the ATF change (in both the Negative and the AAF case).

3.6.8 More Fields in CSV/XML Import Files

The scope for the import of analytical results through CSV/XML files will be enlarged to contain more possible fields.

For the CSV-file:

- Special type of analysis applied to the urine/blood sample: EPO, IRMS, Transfusion etc; in case of IRMS a dedicated field is available to attest the conclusion (consistent/inconsistent)
- Steroid profile data
- Send notification of results to
- Competition name (in case test type is In-competition)
- Only metabolite(s) indicator
- Substance is mandatory (if only metabolite is specified)
- Mean concentration and Standard uncertainty

For the XML-file:

- for IRMS a field for the consistent/inconsistent conclusion (the Special analysis type is already available)
- Steroid profile data
- Send notification of results to
- Mission order #
- Competition name (in case of In-competition)
- Only metabolite(s) (indicator)
- Substance is mandatory (if only metabolite is specified)
- Mean concentration and Standard uncertainty

3.6.9 Segregation of Functions

To reflect the approval procedure as it is commonly practiced within the labs, release 3.0 introduces the concept of separation of functions: the person who enters the data can be another one than the one who approves and submits the data. The userid of the person who executes the submission (implicitly approving) will be stored in ADAMS and printed on the PDF Test report, along with the submission date stamp. This could be considered as the 'digital signature' of the Lab's submission.

The technical configuration of the associated access rights to be assigned to different roles can be handled within the *ADAMS Administration* module (functions User Role Management and User Account Management).

EQAS Samples - Specific:

3.6.10 EQAS Instead of Proficiency Test

The term 'Proficiency test' as used previously will be systematically replaced by EQAS at all occurrences.

3.6.11 Urine Samples Require pH, SG and Screen T/E Ratio

It is mandatory for EQAS Urine samples to specify the pH (2 significant digits), Specific Gravity (4 significant digits) and Screen T/E ratio (3 significant digits).

3.6.12 Quantitative Data per Threshold Substance

EQAS results for threshold substances need to be complemented with Quantitative results (Aliquots and SD) per substance.

3.7 TUE Enhancements

3.7.1 *Retired Declaration of Use, Abbreviated TUE and TUE for Asthma*

In line with the International Standard for TUE2011 the following TUE types are retired:

- Declaration of Use and Abbreviated TUE: it is not possible to enter Declaration of Use and Abbreviated TUEs in ADAMS. Previously entered information will still be available in read only for historical purpose.
- TUE for Asthma: Athlete and doctor user types cannot enter/submit TUE for Asthma form in ADAMS. Only the ADO users can enter/approve/reject TUE for Asthma provided that the effective date is between January 1st 2009 and December 31st 2009.

The screenshot shows a form with three date input fields: "Date Documents Received", "Effective Date", and "Rejection Date". Each field has a calendar icon to its right. Below the fields, a red error message reads: "The effective date cannot be later than 31/Dec/2009 or earlier than 1/Jan 2009".

3.7.2 *RTP is Mandatory*

The RTP field is now mandatory for TUE submissions, it now list 4 options (see screenshot below).

The screenshot shows the "Registered Testing Pools*" section of the form. It contains four radio button options:

- I am part of an International Federation Registered Testing Pool
- I am part of a National Anti-Doping Organization Testing Pool
- I am participating in an International event for which a TUE granted pursuant to the International Federation's rules is required
- None of the above

Below this section is the "Next Competition and Date" label and an empty text input field.

Note: when option 3 (I am participating in an International event for which a TUE granted pursuant to the International Federation's rules is required) is selected the competition name and date become mandatory.

WADA is now only notified of TUE approved for athletes included in a Registered Testing Pool or taking part in an International Event.

3.7.3 Sporting Organization List Is Now Limited

The sporting organization list is limited to:

- The international federation (s) governing the athlete sport(s)
- The National Anti-Doping Organization of the athlete
- Major Game Organizer

3.7.4 Other Minor Fields Renaming

The following terms were renamed for clarification:

- "Notifying Medical Practitioner" is now "Athlete doctor"
- "Qualification and medical specialty" is "Medical Specialty"
- "Medical Information" link was renamed "Medical Guidelines".

3.8 Enhancements for the Organization Administrator

Organization Administrator users will benefit from a few enhancements in ADAMS 3.0.

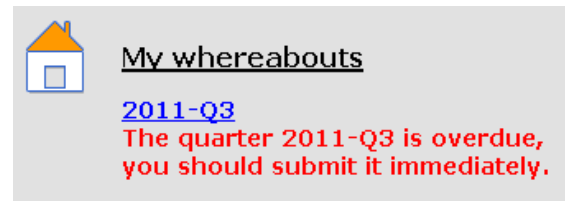

3.8.1 Whereabouts Submission Deadline and Reminder

The administrator of each organization can define deadline by which the whereabouts must be submitted by RTP athletes. The deadline can be either x days before the beginning of a quarter, or on the yth day of the month prior to the quarter. In addition, the administrator can configure ADAMS to send reminders automatically z days before the deadline.

Medical practitioner is mandatory in TUE	<input checked="" type="checkbox"/>
Medical practitioner's phone is mandatory in TUE	<input checked="" type="checkbox"/>
Send email notifications	<input type="checkbox"/>
<hr/>	
Whereabouts submission deadline:	
<input checked="" type="radio"/> 15 days prior to the beginning of the quarter	
<input type="radio"/> On the 15th day of the month prior to the quarter	
Send notification	15 days before the whereabouts submission deadline
<hr/>	

On the defined date, ADAMS sends a notification to each RTP athlete box. If an email address is present in the athlete profile, a reminder email is also sent to the athlete.

When the notification deadline is reached, the whereabouts reminder will also be displayed on the My Zone page of the RTP athlete.

These parameters will be applicable to the RTP athletes for which the organization is the ADAMS custodian.

3.8.2 Whereabouts Calendar – First Week Day

The administrator can define a default value at the organization level whether a Sunday or a Monday should be shown as the first day in the week for all whereabouts calendars in ADAMS, including the mini-calendar and date pickers. The selected day will apply to all new ADAMS users created following its selection. Any organization user with the ability to view whereabouts calendars will have the option to select their own preference in the User Preferences.

Whereabouts Calendar - First day of the week	
<input checked="" type="radio"/> Sunday	
<input type="radio"/> Monday	

3.8.3 ISO Logo for Laboratories

Exclusively for Laboratory organizations, the Administrators will have the option to upload a Lab-specific ISO logo (if desirable the image may include

the ISO certification number). This logo will be displayed in the PDF Test report when produced (using the Print Analysis Result record-button). The screen looks as follows:
